## CST5028 Current Sense Transformers

## **CHARACTERISTICS**

**HEIGHT:** 0280" Max.

**FOOTPRINT:** 0575" X 0.495"

FREQUENCY RANGE: 50 KHz to 500 MHz OPERATING TEMP: -40°C to +130°C

**CURRENT RATING:** Up to 15 amps

## NOTES:

- A) The maximum current rating is based upon temperature rise of the component and represents the DC current, which will cause a typical rise of 40° C with no air flow when both one turn windings are connected in parallel.
- B) The peak flux density of device must remain below 0.20T.

| Part Number | Turns Ratio | Current<br>Rating | Secondary Ind,<br>(mH Min) | DCR (Ω) Max<br>Primary | $\operatorname{DCR}\left(\Omega\right)\operatorname{Max}$ Secondary |
|-------------|-------------|-------------------|----------------------------|------------------------|---|
| CST5028-1   | 1:1:50      | 15                | 3.8                        | 0.00115                | 0.38  |
| CST5028-2   | 1:1:100     | 15                | 14.8                       | 0.00115                | 0.93  |
| CST5028-3   | 1:1:200     | 15                | 59.2                       | 0.00115                | 3.9   |
