Notes for LS7 shielded power inductor:

Test Frequency: At 1.0 KHz, 1.0 Vrms.

Operating Temperature Range: - 55°C to + 125°C.

Current Rating: Based on 0.33 watt power dissipation for approximately 20°C temperature rise.

Inductance Tolerance: K = ± 10% over the entire inductance range.

Marking: Inductance value.

Packaging: Bulk only.

Magnetically-shielded construction.

Manufactured to RoHS compliance.
